

Freezing / Sticking Issues. MUST READ.

If you are experiencing freezing / sticking issues with your box, then you should change the uCode to 001a.

Credit to kampanita for the following.

Delete ucode.bin file and rename the 001a u-code file to ucode.bin.

Upload it.

CHMOD 755 Then reboot.

This fix right here has just fixed SEVEN "broken" Sagem 1xi boxes I picked up on the cheap.

They were all excessively freezing/channels sticking.

ALSO NEW METHOD:

Try removing the telephone modem from your nokia or sagem box. Excellent results so far!
